

A scatter plot showing the relationship between Predicted Energy (x-axis) and Observed Energy (y-axis) for the 2009-2010 season. The x-axis ranges from -5807.5 to -5802.5 eV, and the y-axis ranges from -5807.5 to -5802.5 eV. Data points are colored blue for the 2009 season and orange for the 2010 season. A dashed black line represents the 1:1 relationship. The data points closely follow the 1:1 line, indicating high predictive accuracy.

A scatter plot showing the relationship between Predicted Energy (x-axis) and Observed Energy (y-axis) for the 2009-2010 season.
